Booker Mine
Tongue Quarter Creek
257.27 Acres

GPS Location at Gate
37 30' 31"N
78 29' 18" W
(nad 27)

Directions

On A map find the intersection of route 15 and route 60 at Sprouse's Corner. Go 1 ½ miles south on route 15. In curve you will see a sign for route 714-go to NEXT gravel road and turn right. This is entrance and has gate closed . It is across from two churches on left. After going through gate go past trailer on right. Follow straight on this road and you will see claim sign for property on right sign. There is a road further up on right side we call the number 11 road and turning here will go down to creek. The road has been built for logging and its condition may vary with weather. Keeping straight on main road goes to the Forge area of creek. When you come to a clearing on the left with a large oak tree you should bear to the right. **Do not go straight or take road to left as this is not our property.** This road will take you to the creek. You should not attempt to go any further than the curve to creek unless you have an ATV or 4-wheel drive. Logging has started on the road and conditions of it will change with weather.

Information

Roads into creek can be poor during wet conditions. Need four wheel drive vehicles at this time.

Creeks

Major creek is Tongue Quarter, small feeders off of creek. Gold found here as fines, flakes and nuggets.
